

Java Break

The Java break statement is used to break loop or switch statement. It breaks the current flow of the program at specified condition. In case of inner loop, it breaks only inner loop.

Java Continue

The Java continue statement is used to continue the loop. It continues the current flow of the program and skips the remaining code at the specified condition. In case of an inner loop, it continues the inner loop only.

Java Comments

The Java comments are the statements in a program that are not executed by the compiler and interpreter.

Types of Java Comments

02

Multi Line

The multi line comment is used to comment multiple lines of code.

03

Documentation

The documentation comment is used to create documentation API. To create documentation API, you need to use javadoc tool.

Lets Code it :)
